

## **National Jurisprudence summary**

### **German case no. III 2 StS 2/19**

The accused married an IS fighter online and joined IS. In Iraq, the family knowingly took possession of a house which previously belonged to persons who had fled or been displaced by IS troops. The appropriation of the house, which was designed to permanently deprive the rightful owners of their property, had a functional connection with the non-international armed conflict in Iraq. The accused was found guilty of participation in a foreign terrorist organisation and war crime against property.
